待补论文（29 篇，2026-11-01 核查）

- 2026 / A Speckle Mutual Information-Based Network for Imaging Through Dynamic Scattering Media
- 2026 / Anatomy-Preserving Schrodinger Bridge for Unpaired MRI Quality Enhancement
- 2026 / Cross-modal medical image generation from MRI to PET using robust generative adversarial network
- 2026 / Domain generalization meets mutual bi-attention: A novel approach to drug-target prediction
- 2026 / Fixed-Target Reuse of Sensor-Disjoint Human-Sensing Data via Bridge-Guided Signal-Format Conversion
- 2026 / Machine learning-based assessments of perioperative features in determining long-term conduct block post-transcatheter closure of ventricular septal defect
- 2026 / TumorAL: Evidence-aware active learning for 3D tumor segmentation
- 2025 / Attention Transfer Based Hybrid Knowledge Distillation for Multimodal Brain Tumor Segmentation
- 2025 / Auto-weighted projective one-step multi-view clustering
- 2025 / Incorporating Negative Node Information in Graph Transformer for MDD Diagnosis
- 2025 / Iterative neural networks for improving memory capacity
- 2025 / MVSSL-GT: A Graph Transformer Method with Multi-View Contrastive Self-Supervised Learning
- 2025 / More insights into disruption and decoupling of individual metabolic connectomes in Parkinson's disease
- 2024 / An Improved Algorithm for Spiking Neural Networks with Multi-Scale Attention Coding
- 2024 / Dynamic Graph Contrastive Learning for Neuro Disease Identification using Resting-State fMRI
- 2024 / Effects of individual metabolic brain network changes co-affected by T2DM and aging on the probabilities of T2DM: protective and risk factors
- 2024 / Efficient and accurate capsule networks with b-spline-based activation functions
- 2024 / Improved domain-adversarial neural networks with mixup and pseudo-labeling
- 2024 / Limbic/paralimbic connection weakening in preschool autism-spectrum disorder based on diffusion basis spectrum imaging
- 2024 / Robust support vector machine based on sample screening
- 2024 / Synthesizing Aβ-PET based on multi-modal neuroimaging fusion for pathological diagnosis of Alzheimer’s disease
- 2024 / Topological properties analysis and identification of mild cognitive impairment based on individual morphological brain network connectome
- 2023 / An improved AdaBoost method in imbalanced data Learning
- 2023 / Minimum error entropy high-order extended Kalman filter
- 2023 / PageRank algorithm based on dynamic damping factor
- 2023 / Wavelet transform-based frequency self-adaptive model for functional brain network
- 2018 / 一种自适应分数阶偏微分图像增强模型.
- 未标年份 / An Improved Efficient Algorithm for Spiking Neural Network Through Dataset Distillation
- 未标年份 / Graph Adversarial Discriminative Domain Adaptation with Category-Level Alignment
