待补论文

- 2026 / Domain generalization meets mutual bi-attention: A novel approach to drug-target prediction
- 2026 / Electrocardiographic Alterations Combined with Hematological, Biochemical, and Metabolic Profiles Predict Prognosis in Kawasaki Disease
- 2026 / Enhancing Fatigue Detection Through Heterogeneous Multisource Data Integration and Cross-Domain Modality Imputation
- 2026 / Hierarchical neighbor integration graph attention network for autism spectrum disorder diagnosis
- 2026 / Identification of Major Depressive Disorder Using Multiple Functional Connection Patterns
- 2026 / Machine learning-based assessments of perioperative features in determining long-term conduct block post-transcatheter closure of ventricular septal defect
- 2026 / Multi-Source Multi-View Graph Domain Adaptation with Hyperbolic Residual Encoding for Cross-Site MDD Identification from rs-fMRI
- 2026 / Partial domain adaptation enables cross domain cell type annotation between scRNA-seq and snRNA-seq
- 2026 / TumorAL: Evidence-aware active learning for 3D tumor segmentation
- 2026 / Universum Inspired Graph Contrast Learning for Major Depressive Disorder Identification: In Functional Brain Network View
- 2025 / Attention Transfer Based Hybrid Knowledge Distillation for Multimodal Brain Tumor Segmentation
- 2025 / Auto-weighted projective one-step multi-view clustering
- 2025 / Cross-modal medical image generation from MRI to PET using robust generative adversarial network
- 2025 / Incorporating Negative Node Information in Graph Transformer for MDD Diagnosis
- 2025 / Iterative neural networks for improving memory capacity
- 2025 / Leveraging multi-source and heterogeneous signals for fatigue detection
- 2025 / MVSSL-GT: A Graph Transformer Method with Multi-View Contrastive Self-Supervised Learning
- 2025 / More insights into disruption and decoupling of individual metabolic connectomes in Parkinson's disease
- 2025 / Quantitative susceptibility mapping shows alterations of brain iron content in children with autism spectrum disorder: a whole-brain analysis
- 2024 / Altered intra-and inter-network connectivity in autism spectrum disorder
- 2024 / An Improved Algorithm for Spiking Neural Networks with Multi-Scale Attention Coding
- 2024 / Dynamic Graph Contrastive Learning for Neuro Disease Identification using Resting-State fMRI
- 2024 / Effects of individual metabolic brain network changes co-affected by T2DM and aging on the probabilities of T2DM: protective and risk factors
- 2024 / Efficient and accurate capsule networks with b-spline-based activation functions
- 2024 / Improved domain-adversarial neural networks with mixup and pseudo-labeling
- 2024 / Limbic/paralimbic connection weakening in preschool autism-spectrum disorder based on diffusion basis spectrum imaging
- 2024 / Machine learning models using symptoms and clinical variables to predict coronary artery disease on coronary angiography
- 2024 / Robust support vector machine based on sample screening
- 2024 / Synthesizing A β -PET based on multi-modal neuroimaging fusion for pathological diagnosis of Alzheimer ' s disease
- 2024 / The characteristic patterns of individual brain susceptibility networks underlie Alzheimer ' s disease and white matter hyperintensity-related cognitive impairment

- 2024 / The hidden Markov model reveals the changes in brain dynamics among patients with end-stage renal disease under different dialysis methods
- 2024 / Topological properties analysis and identification of mild cognitive impairment based on individual morphological brain network connectome
- 2023 / An improved AdaBoost method in imbalanced data Learning
- 2023 / Clinical application of machine learning methods in psychiatric disorders
- 2023 / Minimum error entropy high-order extended Kalman filter
- 2023 / New insights into the disorder of brain connectivity in schizophrenia
- 2023 / PageRank algorithm based on dynamic damping factor
- 2023 / Wavelet transform-based frequency self-adaptive model for functional brain network
- 2022 / Jacobian norm for unsupervised source-free domain adaptation
- 2022 / Machine learning-derived multimodal neuroimaging of presurgical target area to predict individual's seizure outcomes after epilepsy surgery
- 2021 / Morphological, structural, and functional networks highlight the role of the cortical-subcortical circuit in individuals with subjective cognitive decline
- 2020 / Group similarity constraint functional brain network estimation for mild cognitive impairment classification
- 2020 / Leave zero out: Towards a no-cross-validation approach for model selection
- 2018 / 一种自适应分数阶偏微分图像增强模型.
- 未标年份 / An Improved Efficient Algorithm for Spiking Neural Network Through Dataset Distillation
- 未标年份 / Graph Adversarial Discriminative Domain Adaptation with Category-Level Alignment
- 未标年份 / Kola: Carefully benchmarking world knowledge of large language models, 2024
